Deliverable D4.5:
Dissemination and Project Promotion Report

What is the contribution of this deliverable to the overall goals of BEST?

The deliverable is intended to report on how work to communicate information about BEST was carried out in the project, and what was finally achieved.

Current Status of the Deliverable

Completed and approved by funding authority (SJU).

What items does the deliverable contain?

When we talk about a "Deliverable" in BEST, we mean not only the formal document describing the work done, but also any associated technical artefacts such as software, models, ontologies, diagrams etc.
However, for this particular deliverable, there are no accompanying technical artefacts - all information is provided in the document itself.

This deliverable contains:

1. Formal reporting of the communication strategy used in the project, including details about website visits etc. It may be of interest to you if you want to know about how project communication, dissemination and exploitation work was carried out.
2. Details of the publications produced in the project. BUT: the deliverable was completed before all publications were completed. THUS: *we recommend that for complete and up-to-date information about publications made in the project you instead refer to section 5.2 of D6.3 "Project Results Final Report".*
